

Our "CERTIFIED" [★]InspirEd Partners

InspirEd Educators is pleased to offer the following products in addition to our "I Think" units and other resources. Contact us today for more information and pricing.

ALBERT'S INSOMNIA, an award winning math game for preK-12, automatically tiers instruction. Young children play to master simple number recognition, later incorporating addition, subtraction, multiplication, division, order of operations, and factoring to hit those challenging targets. Middle and high school students can even integrate exponents and factorials! Albert's Insomnia makes math facts automatic by offering a fun way to practice. The game starts easy and gradually increases in difficulty, so even the most reluctant and non-proficient students gain self-confidence and lose math anxiety by achieving success as they get caught up in "game play." This wonderful resource can be used anywhere, at any time: students can play before testing to get focused, or as a reward for completing assigned tasks. Other benefits of this fantastic resource include:

- constant critical and creative thinking skills opportunities.
- flexibility to play at school AND home to stop the "summer slide."
- develops concentration, problem solving, collaboration and communication skills.
- increases self-confidence and esteem for reluctant math students; players don't feel lucky when they play; they feel smart!
- Reported average improvement on standardized tests for grades 3-5 are: 33% increase in percentage of students that "exceed the standard," 9% increase in percentage of students that "meet or exceed the standard"

Let [★]InspirEd Build YOUR Curriculum!

- InspirEd units for Social Studies, ELA and more
- Products from Certified InspirEd Partners
- Leveled libraries w/ Common Core Packs
